

# Week 7 – Host your website on GitHub

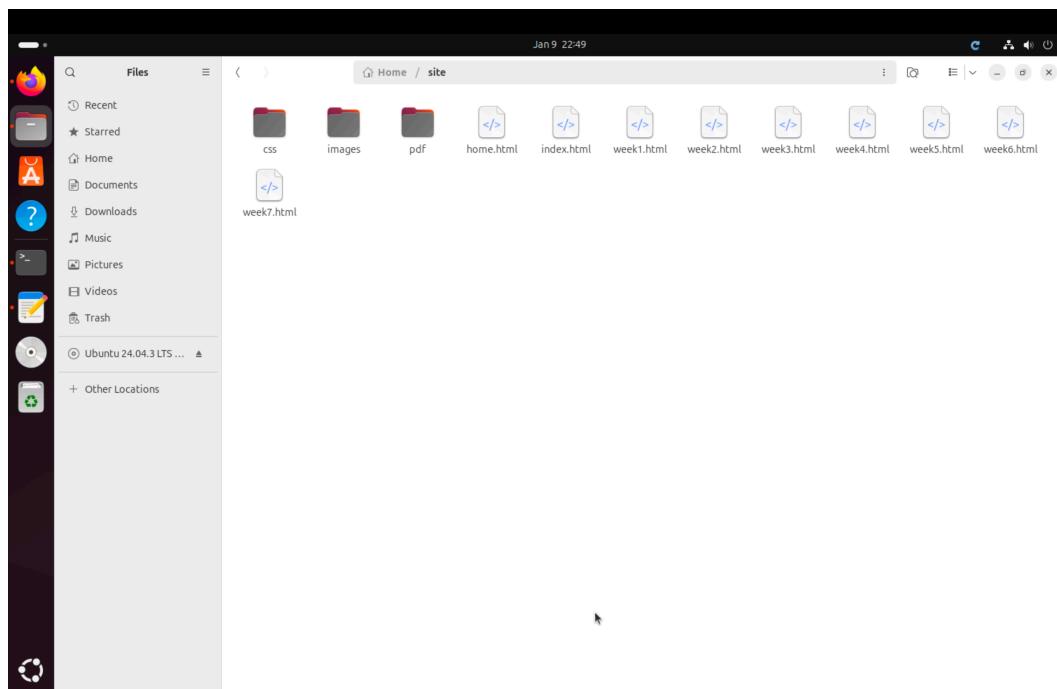

Student number: 585732

**Domain name (URL) of your website on GitHub:**

<https://rushda04.github.io/week7-website/>

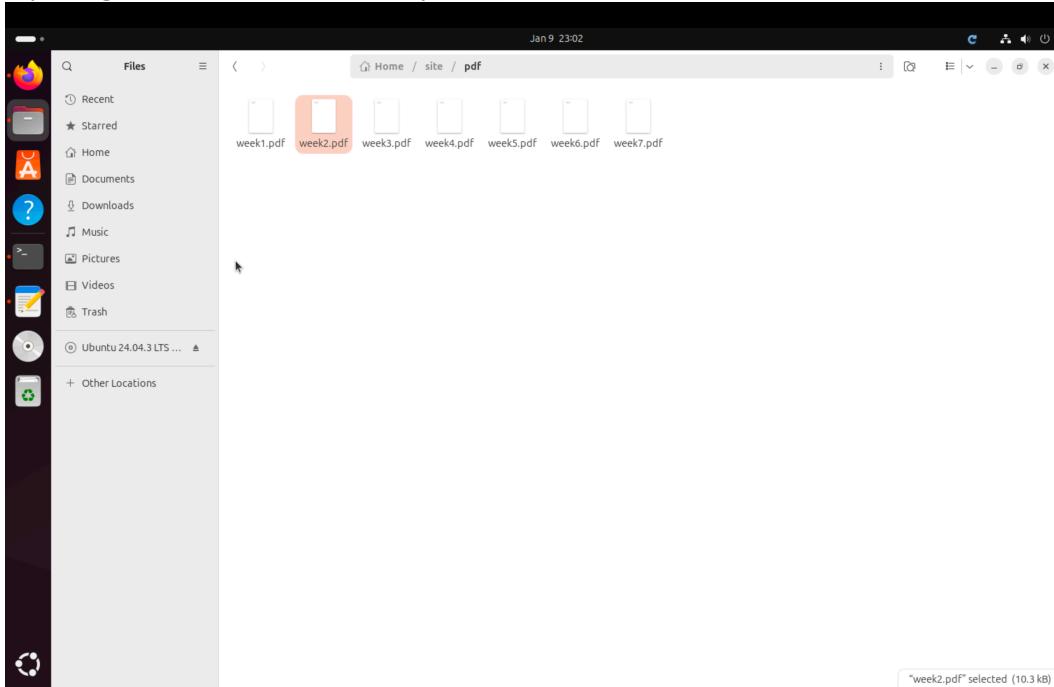

**Relevant screenshots + motivation:**

This figure shows the main website folder structure (e.g., css, images, pdf, and .html files) to confirm the site is organized correctly before uploading.

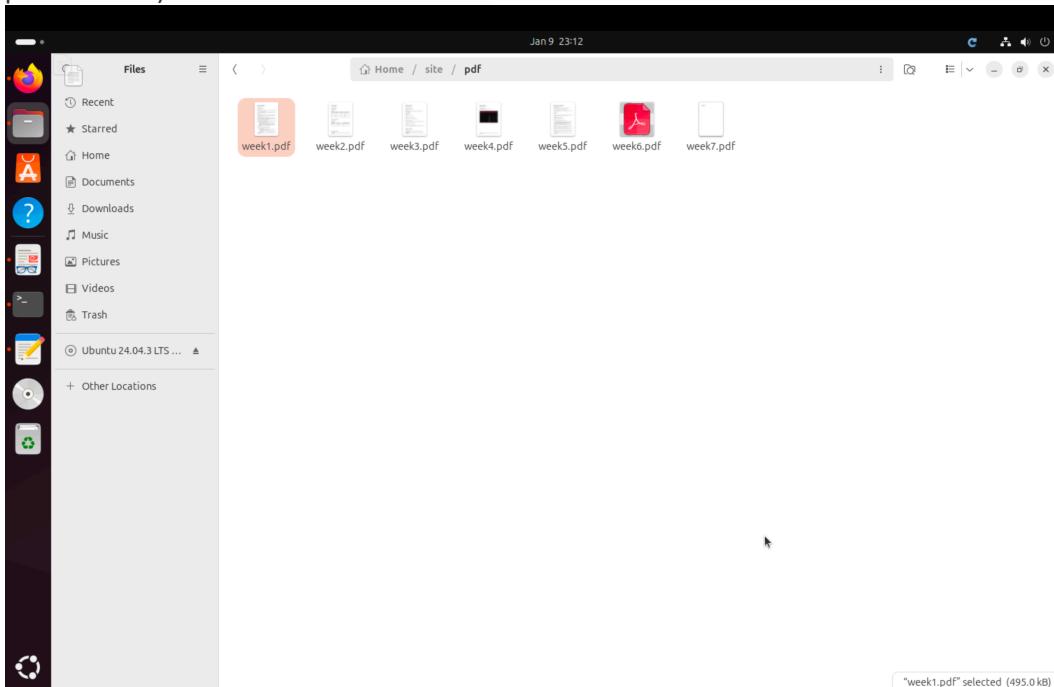

**Figure 7.1 -1 :** Website directory structure (root folder)

This figure shows the initial pdf folder containing placeholder week1.pdf–week7.pdf files before replacing them with the real weekly PDFs.

**Figure 7.1 -2 : Placeholder PDFs in pdf folder**

This figure confirms the real week1.pdf–week6.pdf files were copied into site/pdf (replacing placeholders) with the correct filenames.

**Figure 7.1 -3 : PDF folder after replacing week1–week6 PDFs**

This figure shows the GitHub repository that will store the website files before enabling GitHub Pages.

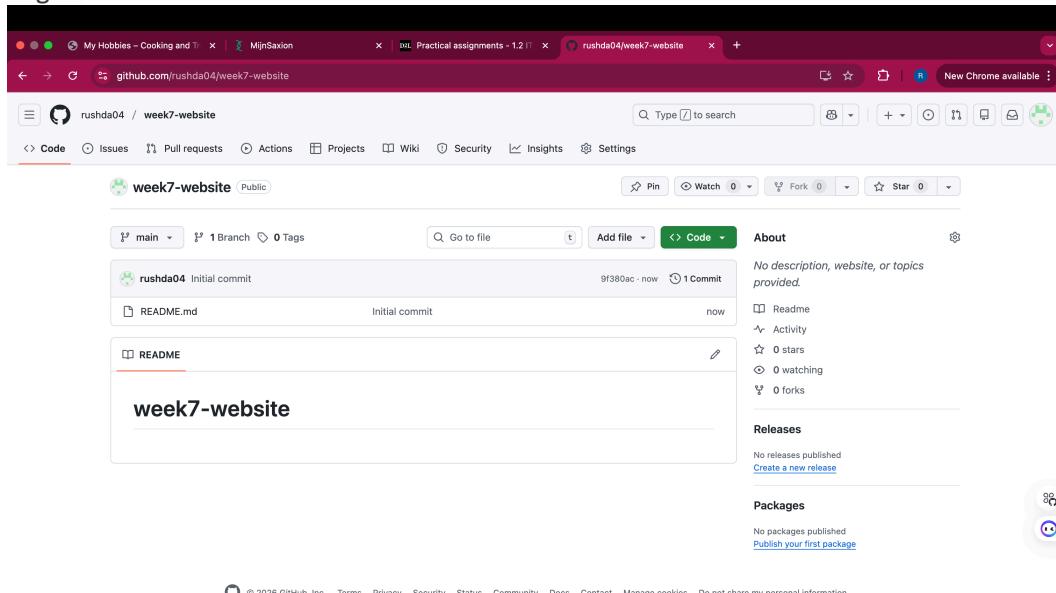

Figure 7.2- 1: New GitHub repository created

This figure confirms the website files were uploaded to the GitHub repository in the correct root structure for GitHub Pages.

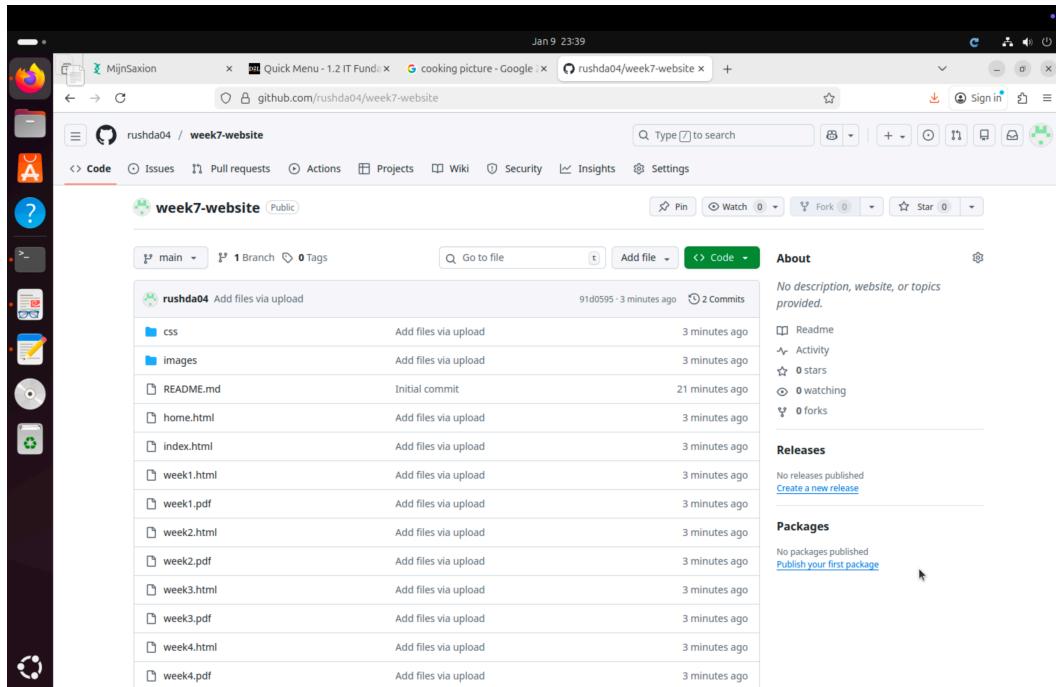

Figure 7.2- 2: Repository file list showing index.html and folders css/ images/ pdf/ at repo root.

This figure shows GitHub Pages successfully deployed the repository from the main branch (/root) and provides the live website link (<https://rushda04.github.io/week7-website/>).

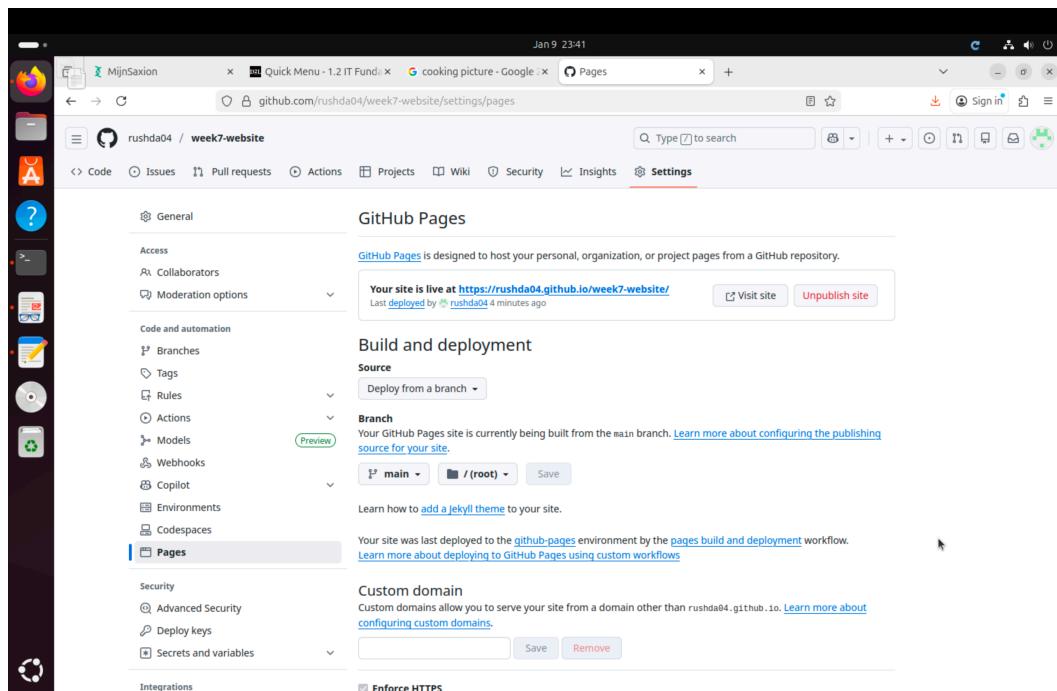

Figure 7.2- 3: GitHub Pages site published and live URL displayed

This figure shows the published website successfully running on GitHub Pages, displaying the homepage content (“My Hobbies: Cooking and Travelling”) and the navigation links for weeks 1–7.

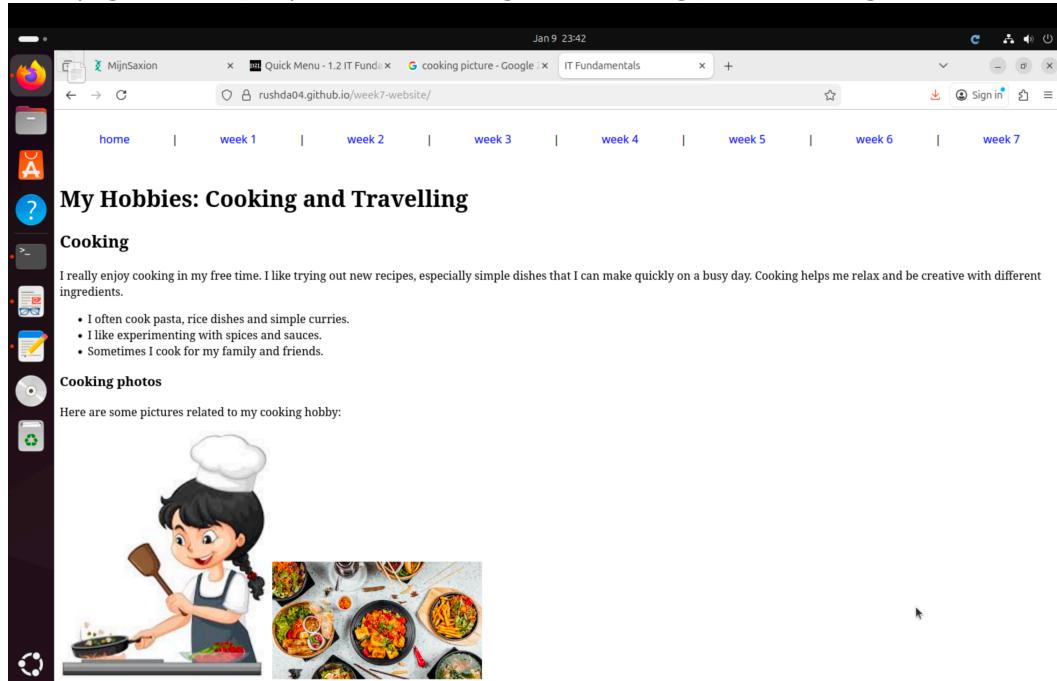

Figure 7.2- 4: Live website homepage on GitHub Pages
